

# Support for treatment of depression and anxiety

## in Virtual Reality

**VR TierOne**

## INNOVATIVE THERAPY

- Do you feel depressed, apathetic, or maybe you are struggling with negative thoughts?
- Do you dream to forget about pain for a moment and get away from everyday reality?
- Low levels of motivation to exercise bother you?
- Do you want your stay in a medical facility to be associated with fond memories?

The innovative VR TierOne medical device was created to effectively support patients in their recovery.

The Virtual Reality technology transfers the patient to a safe and friendly space of the Rebirth Garden.

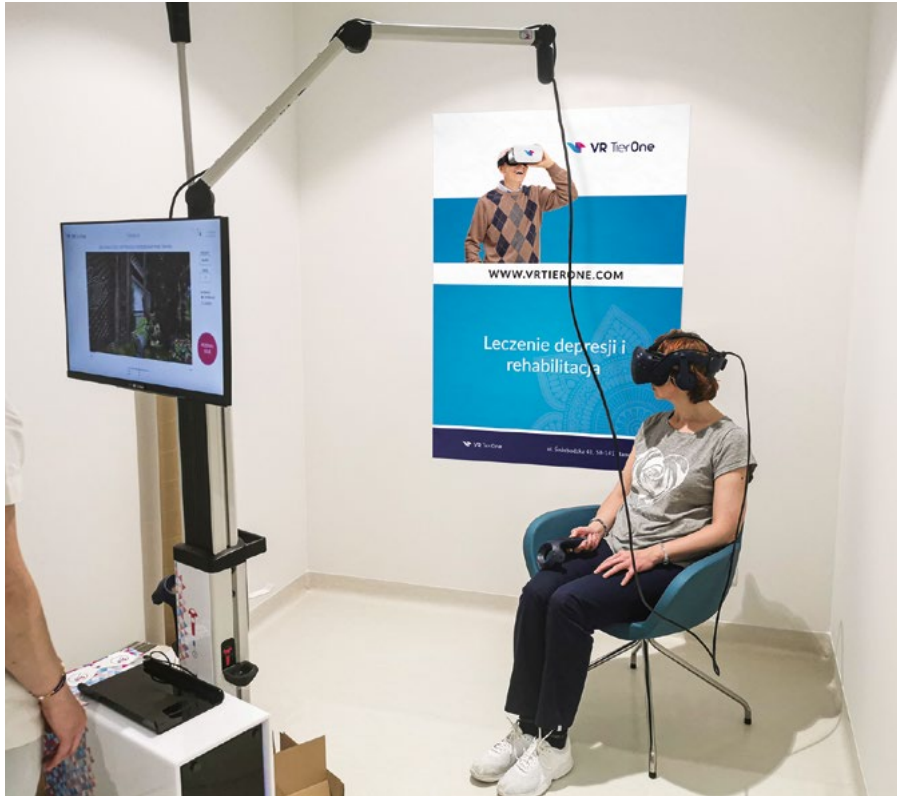

Following the suggestions of a virtual therapist lowers the level of anxiety and depression and increases well-being and motivation for rehabilitation in the real world.

Take advantage of the worldwide innovation, the extremely effective VR TierOne therapeutic method!

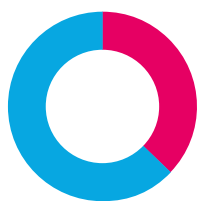

## Explore the therapeutic **Garden of Rebirth**
